DETAILED ACTION

Allowance

Claims 1 - 12, and 14 are allowed in light of the amendment and the remark filed on 12/22/2009. Applicant has canceled claim 13.

The following is an examiner's statement of reasons for allowance:

While the prior art of record by Onoue (US 6,208,104) in view of Müller (US 4,794,513) and Niedermayr (US 4,611,296) teach a multi-axis robot provided with a control system, but it fails to teach or fairly suggest the link means between the arm, the at least one power module and the calculation and processing unit, the link means permitting at least the supply of electricity to the motors from the at least one power module; and wherein the link means includes a single functional bus (B) formed by at least one structural bus, the single functional bus linking a control unit of the calculation and processing unit to the at least one power module and to the at least one digital interface card and the single functional bus enabling the at least one power module to be controlled by the at least one calculation and processing unit and feedback signals to be transmitted from the arm to the control unit and/or the at least one power module, at a frequency of the single functional bus.

Claims 2 - 12 and 14 are allowed for depending on an allowed claim.

This statement is not intended to necessarily state all the reasons for allowance or all the details why the claims are allowed and has not been written to specifically or impliedly state that all the reasons for allowance are set forth (MPEP 1302.14).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
